

Epic Story 1: As a Customer, I want to be able to place online orders and check the status of them.

ID	US1
Name	Customising a main
User Story Description: As a Customer, I want to be able to customise an order online, so that I can create a meal that suits my needs. Acceptance Criteria: <ul style="list-style-type: none">• The Customer must first be able to select a burger or a wrap. If they select a wrap, the customer must select and specify the type of wrap. If they select a burger, the customer must be able to provide details of the type and number of buns.• Once the customer has successfully selected the buns/wrap, they must then be able to select the number and type of patties. Once the customer has successfully selected their patties, they must then be able to select from a variety of other ingredients (lettuce, tomato, cheddar cheese etc.). The customer should be allowed to finalise their mains without electing any of the Other Ingredients.• If the number of any of the constituent items exceeds the maximum allowable limit, the customer must be prompted to select an allowable limit. The system should notify the customer of the maximum allowable limit and the item in question.• The customer should be able to remove an ingredient or item if they change their mind.• If any item is out of stock it should be removed from the interface so that the customer cannot select the item.
